DETAILED ACTION

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Election/Restrictions

Applicant's election without traverse of the species of Figures 1-5 in Paper No. 8 is acknowledged. Applicant has canceled all claims drawn to nonelected species.

Specification

The disclosure is objected to because the related application serial number has not been provided on page 1 of the specification. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 3-6, 9, 49-52 and 54 are rejected under 35 U.S.C. 102(b) as being anticipated by Kemkers et al (US 3,938,228). A conductor is welded between case 1 and lid 3 of the capacitor as disclosed at column 1, lines 64-68. A terminal wire connected as specified in claims 6 and 54 is shown in Figure 2.

Claims 1-5, 7-9, 42-44, 49-53 and 55-58 are rejected under 35 U.S.C. 102(e) as being anticipated by Miltich et al (US 6,402,793 B1). The implantable medical device of Miltich et al includes a capacitor with a conductor welded between case 90 and lid 110 as disclosed at column 31, lines 3-59.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Evans et al discloses a capacitor with a lead welded to a metal case.
